  - Developed feature for Course Review and Rating by users.
  - Developed related APIs in HAPI-JS to render data of users and courses, to the Ember Application in front-end for viewing lectures and posting discussions.

PROJECTS AND
DEVELOPMENTS

- **[Hardware Description Language] Implementation of Hilbert Transformation**
  Electronic Circuit Design Competition in Techkriti'14   *March 2014*
  Worked actively in a team of 4 to implement Hilbert Transform in Verilog HDL. Used Open Source tool
  iverilog to simulate the hardware, using *Cooley Tookey Algorithm.*

- **[Web Development] Website for Crypto'13 - an online game**
  Link: `http://crypto13.comoj.com`   *September 2013*
  Created the web application and successfully conducted Crypto'13, a competitive event in Intra College
  Technical Festival *Takneek*. This involved works in HTML, PHP, JS, CSS and MySQL.

- **[Utility Application] ImageBucket**
  App development in Yahoo! HackU   *August 2013*
  The app queries local disk based on queries such as number of persons in an image, prominent color of
  the image, size and date. It uses OpenCV libraries in Python for face-detection and generates a database
  for each directory. The PHP based query end fetches fast and good results from the database.
